PROFESSIONAL SUMMARY

Data-driven Computer Science student with strong skills in data analysis, data visualization, and machine learning. Experienced in extracting insights from structured and unstructured data using Python and SQL. Proficient in data cleaning, exploratory data analysis (EDA), and predictive modeling. Adept at solving business problems through data-driven decision-making.

EDUCATION

Bachelor of Engineering in Computer Science and Design

B.G.S. College of Engineering and Technology (BGSCET)

Expected Graduation: 2026

CGPA: 8.15

TECHNICAL SKILLS

Programming Languages:

Python, SQL, Java, C

Data Analysis:

Data Cleaning, Data Wrangling, Exploratory Data Analysis (EDA), Feature Engineering

Libraries and Tools:

Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn

Databases:

MySQL, SQLite

Tools and Platforms:

Jupyter Notebook, Git, GitHub, VS Code, Excel

Machine Learning:

Regression, Time Series Forecasting, Model Evaluation (RMSE, Accuracy)

PROJECT EXPERIENCE

Stock Market Prediction and Analysis

- Performed exploratory data analysis on historical stock market data
- Built time-series forecasting models using ARIMA and Prophet
- Reduced prediction error (RMSE) by 22% through parameter tuning
- Visualized trends and patterns to support data-driven insights

Technologies: Python, Pandas, NumPy, Matplotlib

Automated Defect Detection System

- Processed and analyzed over 1,000 image datasets
- Developed a classification model achieving 92% accuracy
- Performed data preprocessing and feature extraction
- Applied image compression techniques reducing storage size by 50–70%

Technologies: Python, OpenCV, NumPy

E-Commerce Data Analysis and Optimization

- Analyzed user and transaction data to improve system performance
- Optimized SQL queries, improving database efficiency by 35%
- Designed structured data models for multi-role systems

Technologies: MySQL, Python

Expense Tracker (Data Analytics Focus)

- Developed logic for expense categorization and aggregation
 - Implemented filtering and reporting features for financial insights
 - Designed data structures for trend analysis and summary reports
-

INTERNSHIP EXPERIENCE

Web Development Intern
Rooman Technologies

- Worked on backend data processing and application logic
- Assisted in data validation, debugging, and testing
- Collaborated using Git in an agile development environment

ACHIEVEMENTS

Best Business Plan Award, BGSCET MBA Department, 2024
Semi-Finalist, TGS Ideathon (Top 10% among 250+ teams)
